Principles of Good design

is
unobtrusive

dominate, help,
decoration, invisible

is
aesthetic

alignment, grouping,
grid, closure, white
space, human form

is as **little** design
as possible

simplicity, reduction,
organization, context,
progressive disclosure

makes a product
understandable

conventions, signifiers,
errors

makes a product
useful

effort, nudging, security

is
honest

mapping, visibility

is
innovative

associations, iterations,
prototyping, testing

is
timeless

timeless, consistency,
trends, fashion

is **thorough**
to the last detail

color, typography,
brand, experiences

Design Process: The Right Terminology

Sketch

Mockup

Wireframe

Prototype

Test

Car

What

It starts with a sketch on paper. No technology restricts the creator.

It's a fake, a painting to portray a vision how the final outcome can look.

It's a simplified model that looks as if it is made of wires. The first step in CAD.

A 1:4 clay model is created. Then a 1:1 clay model, that looks exactly like a real car.

The prototype is tested. First with the clay model in a wind tunnel, then with metal prototypes.

Why

The first time the idea becomes visible and you are able to discuss about it with others. No special skills needed.

Shows how the product will look. Helps to get buy-ins from stakeholders. No programming yet.

Shows groups, controls, the flow, and how the users will have to interact with the application.

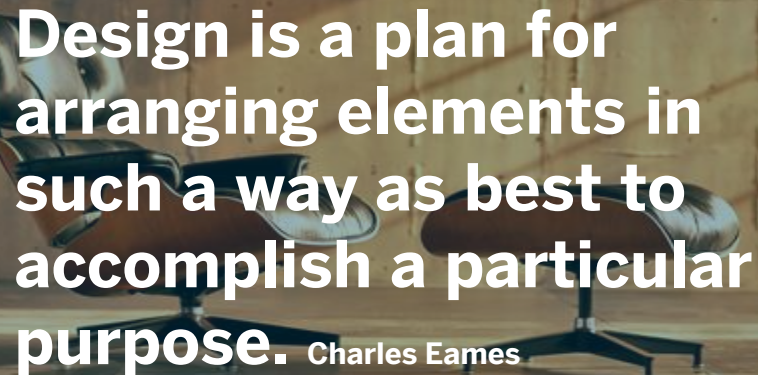

THE tool to get feedback. Used for testing, improved via iterations. A prototype is not perfect but has at least some working parts.

Hand your prototypes to users. The people in the office next door, experts, customers. Let them beat it to death. Then use the feedback to create a new prototype.

Software

Definitions

Design is a plan for arranging elements in such a way as best to accomplish a particular purpose. Charles Eames

Design has to work, art does not. Donald Judd

Design is not only about how things look but how they work. Steve Jobs

To design something is to make a series of decisions that shape the experience of the user. Steven Levy
